Dear C.

Thanks for your letter. Shall tell V. & if he goes West shall give him a letter to you. Jacobs has offered him some encouragement to remain in N. Y. & I think he may do so. Shall be glad of the notes on Reynaud's disease.

Walt's eyes are better. I took him to Norris. He has ext. strab. & absence of patellar reflex - I expect he has had pretty intimate relations with those prostitutes about whom he sings so joyously. Nothing further about the renal tumor. Saw the case of Filaria (?) nothing to be found. Heard from the Doctor yesterday - said he had sent a slide with a worm - but it has not yet turned up. Have been quite busy; three or four very interesting cases in consultation.

I send you E. Smith's paper on hereditary ataxia to read and return - very instructive.

Yours ever,
Wm. Osler.

Walt Whitman?
