The growth of a profession
Can Am. Soc. Hyg. Jan Oct 1885 179

A Conventional address - turns in a point - a President's address in a general sense
directed chiefly toward the
to point out the duties of the profession

at the

Sept 2-3

The Chatham meeting he gave a plain straight forward talk on the growth and development of the profession, the importance of the Bureau of Hygiene, the state
consider and discuss relating to Medical Journals, Medical Education, Boards of Examination
it was rather long and on

of the address

and soon - doubtless necessary and important, but he did not illumine the essay
made as he did such things in later years with allusion of justification from his
favorite authorities in rather dull reading matter.

included justification for the profession
of the North-West coast came down from
to them of our older part of the Dominion

At this same meeting he was done for a paper on the
Historical and Pathological Relations of the Coecum Caecum
and appendix which appeared in some medical journal
presume from the same journal indeed. It is a paper he
did not see for some time.

With good feeling in 1880 for president
to the Am. Soc. Hyg. a case of prostration of the
appendix with circumcised obscure pathology not
the board.

The Organized Profession

Three chief topics

- 1 Preliminary Education and Matriculation
- 2 The Regulation of the Curriculum
- 3 The Control of the Licensing power as the most important
function of the medical board.

Keeps reference to support the State Provincial Board of Health.

- 2 The Medical Journal upon topics ^{standards of admission and} education - journal school - exam courses.
- 3 The Medical Society - upon

45

Memorandum of the meeting - he was then asked back to Philadelphia he would have done in Denver
and he is troubled by the matter but not the fact in Friday. He receives a visit from
Ogden whom he writes soon after that "Walter's eyes are better" and that he
has been quite busy having seen "three or four very interesting cases in consultation."

Walt
Whitman the ~~first~~ whom he must have been attending
at this time in Camden?

It could not have been very well for his mother writes on Sept 19th and ventures to prescribe
for him: (I don't use date just the quote)

Don't use help feeling

She hopes his "boils" are blains as clear gone - offers a
four days at the sea with the stage, and
adds that

And on ~~letter~~ her own Chronicle of the family down to the next week, ~~the stage~~ they had all enjoyed
reading the President's address at Chatham and that "about [Picot] thought it the wisdom of 107 years
