My dear Willie

Father and I have been up for a week at Dundas and enjoyed the country in the delightful autumn weather. The medical news was forwarded on to us there and we all enjoyed the reading of the President's address to the Association at Chatham. Aunt thought it equal the wisdom of 107 years of experience--sound sense it certainly was. Marion asked me to remind you of what you said to her about writing to someone at Dresden about Isabel. There was a pencil note from her written on board ship--they had rather a rough passage. Miss Glendinning had arranged with some one to meet Isabel in London and take her to Dresden.

Amy and Clara look very well and very English--they brought some things of yours left at Mrs. Shepherds and want to know if they are to be sent on to you or reserved till you come there was an idea of your coming up for a flying visit in October. Is it to be so? Edmd. and Annie had a pleasant trip to the N. W. Y. they took Belle with them from Qui-Appelle to the Rockies and spent a day with her and Frank on their return. They were warm in their praises of both--F still has his cough but is better--they may be down this winter. Aunt is sending you the promised photos by this mail. When at Lemsseth they were having the Church on the hill photographed--two views--one dollar, may I order them for you? To help defray the expense of removing the church to the village--Fenn, B.B., Edmd. and ourselves are taking them.

Did you enjoy the few days at the sea, it must have been delightful if you had the delicious weather we have had. Are the boils and blains clean gone? Alex's grew to large proportions, Dr. Burns lanced it but it kept him from school a week.

You have not sent the list of names required for addressing those pamphlets, the other books have been sent back.

Ever your loving Mother  
Ellen Osler

There were 2 numbers of the Medicine news, do you wish one of them forwarded on to you?

*Tecumseth.*
