(Dr. H. V. Ogden)
Saturday Dec. Probably Janr '86

(1884 ?)

Dear Ogden

ve 24 W
Have just got home after a week or more in Canada & N. Y. Did not go to M. Found all well in T. except 3 sore throats - membranous tonsillitis - at Mrs. F. Jack's very like diph. Met R. P. H. in New York on Tuesday, and we attended a meeting to arrange for a special Med. Soc. of Clin. Phy. Thanks for the card. Best New Year wishes to you.

Have read the case with interest - very curious - evidently a vaso-motor disturbance, 1st cousin to if not actually Reynaud's disease. I think - but am not very positive - that the term is limited to the cases of Symmetric gangrene.

Regards to Senn. & Dorland. V. has put out his shingle in N. Y. among the Israelites of upper Lexington Ave.

Yours ever,
W. O.

Just make
J.M.L. for the card needs
of the Coll. of Phy.
Honored
Original 1st President
Prudman
W.O.
Some men refuse membership in young Assoc.
but must join in - in many.
