New Year's Day 1901

My dear Dr Osler

Your second

kind present. has reached  
me at this season of gifts  
of the New Birth and  
the New Year. I have been

sipping Acquaintance, I

hope soon to drink a  
full draught. may not our

but many. It is indeed

kind of you to propinate  
me thus, & present this cup to

" Iud n dris calicem tuum  
propinas

Humane facis. Osler et supube"

one of the pleasures and

profits I would see in

this - coming year is

seeing you take up your

residence here, and begin

walk with a few us.

You have I think Arthur  
Jex-Blake with you in

Ballinacree. I have always

thought him one of the

most promising men we

have had here at Magdalen

I hope, I feel sure, you

like & think well of him

I am delighted with Physic

& Physicians in - Plato.

But if I begin on this  
Lecture I shall never  
end.

With every best wish then  
for the New Year

I am.

Yours & sincerely

F. Hedul Warren

You will be glad to hear  
that an effort is being  
made to get a real  
Chair of Pathology here.
