Dear Dr. Yarrow:

I asked that careless fellow if I should write to you & he said to - I am going to leave Washington in a few days! He has arterio-sclerosis & angina or anginoid attacks. He is not worse than when I saw him a year ago.

My stenographine is away & I cannot lay my hands on my last note of his case. It would be well to keep him as quiet as possible & keep his tension low. He did not stand the K.I. which I ordered him for the sclerosis. If I remember aright, he has now signs of enlargement of the heart. I will send you word as to what I ordered him when my Fräulein returns. Sorry for the delay in answering yours of 30th inst. I was in New York Saturday & Sunday & yesterday I was too rushed to allow of letters.

Yours sincerely,

W. Osler.
