

CUS417/100.51  
(Dr. Leonard Rogers)

1 West Franklin Street,  
Baltimore, Md., Feb. 10th, 1904.

Dear Dr. Rogers:

Thanks for your bundle of papers. You are doing good work in stirring up a knowledge of amoebic dysentery and of amoebic abscess. Our brethren in England have been altogether too slow in the recognition of the subject. I was very much interested in that malarial pigmentation of the intestine. I saw a remarkable case of it in Philadelphia some years ago.

With kind regards,

Sincerely yours,  
W Osler
