of Tuberculosis
Baltimore, Md., Dec. 12th, 1904

Dear Howell:

Would it be possible to have a third year student appointed to take charge of the Epidiascope, and give him a remission of one half his fees? It is a very important matter to have some one who can take complete charge of it. It is a very valuable piece of machinery. I enclose Emerson's letter.

Sincerely yours,
W^m Osler
