Dear ~~Martin~~

I have been looking up the Hughlings Jackson triad today & have not been able to find a very good account. Bruce in Gibson's text book is the best. An Italian article has all the cases, but the reference is at home. I would like very much to refer to Judge ~~Baino's~~ case, when I publish my paper. Would you ask Roddick if I could have a photo of the tongue protruded &, if possible in the mouth too. The lip points in different directions in the two positions, & could you see if the left side of the palate is paralysed - it usually is. If the Judge could stand a camera on the back of his neck also - to show the atrophy of the upper Trapezius 'twould be pleasant. Let him mask the upper face when the tongue is photographed. Send me a memo of the cost of the photo. I wish you were coming with us. I have been beguiled into Editing a 7(!!!) volume System of Medicine, (McCrae to do the dirty work!) & shall need your help. What would you like to write - think & say. . . .

Many thanks for all your kindness to Bill - I appreciate it very much & he has picked up a great deal.

Yours, ever

W Osler.
