Pointe a Pic

Quebec, Canada.

Sept. 6th. 1904.

Dear Pratt,

Thanks for your kind note and the slips. Very glad of the references in the Gazette des Hôpitaux. Somebody told me of a study in progress on the strength of the Aorta, but I have forgotten who it was. I wish you would look in the Harvard Museum if there are any specimens of rupture of the Aorta, or of splits of the intima.

I am to edit for Lea Brothers a new system of medicine. I shall get only the younger men to contribute. Give me a few hints from Boston; (1) what would you like to write? (2) send me a list of the younger fellows and the special work they have been doing. Cabot will take the blood section. I suppose there could be nobody better than McCallum for Diphtheria and Scarlet Fever. One of Councilman's men should do the pathology. I have not asked him yet. I shall be here until the 14th September.

Sincerely yours,

W^m Osler
