

G. R. O. to W. Mallock

CUS417/130.26

(letter, script)

Tuesday Eve
[17th Oct '19]

--- All day he was in the most awful
dumps, groaning & sighing & coughing all the
time - He was giving me messages for various
people & really I felt hopeless. He had the
chase at night & was quiet four hours &
then a tremendous sweat, The temp has not
been over 101 today & his whole morale has
been better - & he says he feels quite different.
Dr. Gibson seems much encouraged. We have
poulticed a lot and it seems to soothe him.
I could not sleep at all last night but shall
try tonight
