Oxford

Dear Shepherd

I have had a horrid attack - a paroxysmal, spasmodic bronchitis very much resembling whooping cough tho. I had no whoops. Fever for a week & quite severe bouts which nothing but morphia controlled. I am better now, but still in bed. I got caught in the strike returning from Scotland and had to motor from Newcastle.

We had a wonderful holiday in Jersey & I got back my prewar weight and was in fine form. I must not complain. I have had a good innings as far as health goes.

Things are improving here. I doubt if Geddes even gets away. He is more & more tied up, & H A L Fisher tells me that Ll George depends so much on him. Love to Cecil & Dorothea. I hope you are keeping well. We see Archie Malloch every week end - He is taking P. G. work in London. Billy Francis sails next week. He will call & give the latest news of us.

Sincerely yours,

W Osler
