

The year found much more the preceding one. He was busily engaged in his clinical teaching, in laboratory studies, attending meetings and foreign visits.

There were two important papers He took a two additional issues, one journal was a series

of Notes and Comments for which he sent to Ross for the Canada Medical and Surgical Journal ^{to whom pages} since a few years before had been such a copious contributor. The first series appeared in the March issue and has this foot note.

 Bastian
 anti-felina, strophanthus
 [quote 510 of the Religion]~~

The first book and I think you have seen some of the material taken from modern
 journals of the past, and I think you will find it very interesting. The only one you
 have seen is the one on the anti-felina, strophanthus. The other one is the one on the
 Bastian. I think you will find it very interesting. The only one you have seen is the one
 on the anti-felina, strophanthus. The other one is the one on the Bastian. I think you will
 find it very interesting. The only one you have seen is the one on the anti-felina, strophanthus.

in yellow parchment

through the fact he was undetermined... Pneumonia in the Philadelphia Hospital... Union Park of Abi. It is interesting to read... and ~~was~~ by himself. Med. News. Mar. 5 1877 p. 260

Groups of Pneumonia patients - "the alcoholic and the temperate, the majority of the former die in spite of all treatment; the majority of the latter get well with ease, or with no, treatment" - are to be found in the same, alcohol, and antipyretics. and antipyretics to mention two or three the drugs administered by the others.

This was followed by similar statements issued by the leading physicians of the New York & Boston Hospitals and then by other editorial summaries in which it is found that the pneumonia of a specific self limited disease and the rational treatment is the expectant one, but he concludes with this interesting paragraph

Order in which the word stand in Med. News... the treatment of pneumonia was... means unchallenged, for authority... Venetian... contained to provide to be... Med. News... p. 586

It may be, however, that to the generation which will follow, at the ^{same} hospitals the men whose practice we have given, the symptomatic and expectant plan as present in vogue will appear as crude and unscientific as does to the the active antiphlogistic treatment, with venesection comp sur comp and antimony to reflection.

giving of ~~individual~~ individual practices conducted ~~of a kind of~~ on similar lines, appeared later in the text

A subsequent series of papers on the "Treatment of Pleurisy given in the Philadelphia Hospital". Med. News. Dec. 10 1867 Vol p. 677

Dr. Osler believes that a plan of armed expectancy to be, in the present state of our knowledge the most rational. The majority of the cases require little or no medical treatment. The Pontons of a resolution due under the worst case you intelligent nurse, meets the indications 'morbi'." Then follows

the account of the ~~practice~~ practice employed in the ^{Hospitals} of New York, Boston, and Montreal. This was followed by his editorial in which

Med. News Dec. 24 1867 Vol 739

he deals with the subject ^{of} and says that the reports show a remarkable improvement of pneumonia with ^{the} Hygiene, diet and nursing as the mainstays. Part taken in one of his 'Notes' to the Press
