Dear Dr. Jacobi:

Do you happen to have in your library Gaudard's thesis (Geneva) Contribution à l'étude de hémiplégié centrale chez les enfants? I cannot find it anywhere in the libraries and am anxious to consult it within the next week or so. I would send for it, but I have promised a paper on the subject at an early date and would scarcely have time. Should you have it I should be so much indebted for its use for a few days.

With kind regards,

Sincerely yours,

Wm. Osler.
