not to go further.

Dear Musser,

A complication has arisen. Tyson wants the clin. chair if arrangements can be made for a proper occupant of the Pathol. chair. This latter would be a great difficulty. I can readily see why T. wishes clinical med. He cannot be quite happy in Pathology as the stream has passed by him & he sits on the bank looking on neither swimming nor moving[?]. In certain quarters Guitera's stock is very strong.

Yours,

W. Osler.
