

CU5417/85.52

(Handwriting)

(To Dr. John A. Mullin, Hamilton)

Johns Hopkins Hospital,
Baltimore, Oct. 3rd, 1889.

Dear Mullin

? Sorry for poor Ramsay it looks bad. Sinclairs case is unusual
? the post-hemiplegic chorea is almost always on the paralysed side but it may
be on the opposite & there is a pre-hemiplegic form. His condition looks cor-
tical I shall be up next week towards the end - will telegraph you from the
? bridge. I fear Mrs Malloch will run down fast this winter.

I am going into housekeeping - Tell Mrs Mullin this is preparatory to marrying
a widow with 8 or 10 children.

Yours

Wm Osler
