Monday

To W.S. Thayer from W.O.

1894

Dear Thayer

Yours & the book came this a.m. Thanks I will ask for estimates on the plates. We have been enjoying London so much-theatres dinners etc. I have not seen many Drs. except at the Comitia of the R C P. and at the dinner in the eve. They put me next to the president who pumped me dry about our work. Dear old Wilks too has a great idea of the future of the Hopkins. I have been at Gowers' for several evenings. He is much better tho still a little excitable. I went with Horsely to a private operation on Friday. He took out a ~~dural~~ sarcoma about the size of the fist which had been growing for 15 years & had caused fits supposed by a long series of neurologists to be truly Epileptic.

I am so distressed to hear of Harry Thomas. The apices seemed clear when I examined him six weeks ago. There was a pleural friction on the left side. I remember in his former attack of pleurisy with effusion that he had some suspicious crackles at the left ~~mammary~~ region but I thought them pleuritic. I am going tomorrow with Blackader, Roddick, Stewart & Dr. Schwenitz to the B.M.A. at Bristol & then on to Falmouth. We go on the 8th to Oxford & after that to the sea for a fortnight. Then t Paris for a week & back here again. Let me know if I can get you anything. I will write H.T. at the Adirondacks. Poor fellow It seems very cruel, just as he is getting on so nicely & developing so well.

Love to Barker & all the boys

Yours  
W.O.

~~Want to see Gray Osborne just before by us too~~
