Dear Thayer

I was very glad to have your nice long letter which reached me at Tenby. We were nearly frozen in South Wales - so cold & damp & we came on here yesterday for the Yoze valley which is divine. Today we were rowed 12 miles down to Tintern Abbey we go up the river to Hereford & then to London.

I am delighted to hear good accounts of the malaria. I am sure it will be a very telling peice of work. Did you do anything about the sub-cut fibroid case? Dictate a lecture to Miss H. on it. I am sorry t say we shall not be back until Oct 1st and as I must see you for a couple of days you & Smith might postpone the sailing until the 5th. You need not hurry back you will have earned a good six weeks. We shall go directly from N.Y. to Toronto. I have not had very good accounts of my father - the heart has tried him very much.

Set Miss H. at the Histories filling in the no of the autopsy & the anatom. Diagnoses in all the fatal cases. She has also the lectures on abd. Tumors to send off. but there is no hurry as I have told her to be primarily at your disposal.

I am sorry to hear about B. - sorry for his fathers sake more then anything. I hope he will pull up a bit. Delighted to hear that Parsons will come over to us. We shall have to look out for one or two others. Love to all the boys.

Yours

Wm Osler

Killed off to Sweden a word.
