Dear Lafleur

I was very sorry to see, by the Journal today, that Williams had died. Poor fellow! an early call. I saw him in Montreal & he talked so earnestly about his work.

I am back again at the Typhoid & Malaria - wards full. I am just issuing a second report on Typhoid fever, which will contain some interesting papers. Mrs. Osler keeps well. She had an ugly attack - local peritonitis - in June before leaving. She 'expects' (in the gentle language) in January. We hope for better luck this time.

Yours sincerely
W^m Osler

Willie Francis has just come for his Univ. course. He sends his love.
