?

Doublin about Sept. 16-17

Dear F.J.

Thanks for the strop - I cannot live comfortably without it. So sorry to hear of T. Johnston's ^{illness} illness. I fear it is cirrhosis - poor chap! hard lines as he scarcely has taken enough to pickle his liver so early. We shall look for you in the Xmas vacation about New Years. Could you not bring Cecil?

Love to all at home

Yours sincerely

Wm Osler

~~From Acad. Soc. Sept 19th for to Boston & Maham & Jan Memphis to the this summer (J.P. then at Carleton)
Went back to Balto on the 21st. Then went to Toronto probably to see family at 313 and probably to see Jess again.
perhaps and quite probable or was over for them.~~

~~WO returned to Baltimore after his recent summer and was at
work with consultations Friday Sept. 16th much earlier than usual. Mrs. Butler~~

~~The consultations evidently ended Sat Sep. 14 and this must have been the
time of his pneumonia and visit late to Wells base rather than in 1897
for these does not seem to be any head in the 1897 diary. This was the time of Clifford
Had to call off his Pepper address at opening of term. Same lecture!~~

U.S.C.

Body O. heard that Jm C Case in house 10 let us say Sep 26-27 and went down himself.
