Dear Shattuck

I have been enjoying a quiet evening with old Elisha Bartlett, W. W. Gerhard, G. C. Shattuck Jr. & James Jackson Jr. - delightful company after the Medico-Chirurgical Bulletin and trash of that kind! Your father's papers I found in the Med. Examiner for 1840 and Valleix gives a very full summary in Archives Generales for Oct. - Nov. 1839. The contribution is admirable. I had never seen it before. Stille too has a paper which he read at the Societe d' Observation some months before your father's. It has never been printed. I must get a copy from the old man for I should some day like to collect the essays of W. W. Gerhard, your father and Stille & publish them together. (B.M.J. November 1st) I see dear old Sam Wilkes is still under the delusion that Jenner in 1849-50 first clearly separated typhus & typhoid! Very sorry not to have seen you. Love to all at home

Yours

Wm Osler
