Another proof of the... relating to
medicine that is being taken in Baltimore may here be re-
lated. At the Johns Hopkins Club Dr. Water showed an in-
teresting collection of the work of Boerhaave which he had
secured during the past summer in Holland. A majority of

the only daughter of Boerhaave. Boerhaave's set of original
edition of the oration, the first of most value was the second
edition of the 1st. The original with Boerhaave himself and many other
by Boerhaave himself, and many other of the annotations
the second part, which was intended for corrections, and in-
subsequent edition. There was also a very curious notes for a
quadrant, with which tables of remarkable old-
