Dear Miss Charlton ^{for}

I have sent to the Library Payne's facimile reprint of Linacre's Edition of Galen's de Temperamentis, and Jebb's edition of some of the rare works of Caius (the original of which are practically out of reach). I sent yesterday (or ordered to be sent after the binding is repaired) Boyle's Natural Philosophy 1667, from the end part of which a good idea of the state of medicine about the middle of the 17th. century can be obtained. I have too ^{at} ^{Perrier's} the binders in London the rare English edition of Harvey's de generatione, which I will send early next month.)

Sincerely yours, &c

(Signed)

Wm. Osler.

Give them all to Dr. Findlay with my compliments and regards.
