Dr. C. P. Howard

*Dr. Langhale P. Howard fulv.*

Dear Campbell:

I am delighted to think that you shall be in the M.G.H. on Sept. 1st. How long is your service, 1 or  $1\frac{1}{2}$  years? I think if you wish it I could arrange to take you on my service next year (after finishing at the M.G.H.) You would come in as one of the four senior Residents and the work would be mainly bacteriological but you would see all the work and have to help in the teaching. If you think of it as likely, pay special attention to bacteriology this winter with <sup>[John]</sup> McCrae your Resident Pathologist - in fact it would be well to get him to coach you. Of course if you think two years of Hospital work too much, with what you wish to spend abroad, it might be possible to arrange for some special work, but you would not have

the advantage of living in the Hospital. Aunt Grace and Revere send love.

We sail Sept. 14th.

Affectionately yours,

Wm. Osler.
