Dr. William Osler,
No. 1 W. Franklin Street.

Consultations by Appointment only.
Between 2.30-4.30 P.M.

Baltimore, Oct. 8th, 1902
Wednesday

(Dr. Scudder J. Woolley)
(typewritten)

Dear Dr. Woolley:-

There was nothing in the smear. Sorry to hear that the fever keeps so high. I believe it would be better, if in a week or ten days there is not some definite improvement, to take her back to New York and have Bull, or some surgeon who has had large experience in these cases, enlarge that wound and make a very thorough exploration. Even getting the deeper portions of the cavity permanently drained might be beneficial. Let me know how she gets on. Give the little lassie my love.

Very truly yours,

W^m Osler
