Baltimore, Md.

(typewritten)

Nov. 7th, 1903.

Dear Martin:

I am very distressed to hear of Blackader's fresh infection. It really looks serious, as though it had crept up to the kidneys. It is a most distressing and so hard to know what should be done in such a case. I had a letter from him from Saratoga, in which he felt very encouraged, and I felt that everything was going smoothly. Do let me hear in a day or two how he is.

Sincerely yours,

W Osler.
