July 22 1903 - Philipps dispensary opened Henry Phillips present some rooms filled paper
Osler's paper as Intercalator in the Prince Hospital

In 1899 W. O. through the generosity of friends arranged that one of the medical students should visit the home of each new case of consumption coming to the Johns Hopkins Dispensary, to report upon the hygienic surroundings and to assist the patient and family to an understanding of the nature of the disease and the necessary measures for its prevention. Miss Dutcher was the first appointee, a fourth-year student, and the account of her work was read before the Lanneau Society at its first meeting, October 30, 1900. It is probably the first systematic account of a domiciliary visitor attached to a dispensary. Miss Dutcher's work was so promising that other women medical students, Miss Blauvelt in 1901 and 1902, and Miss Rosencrantz in 1903 continued it. In 1904 a trained nurse, Miss Thelin, took over the work, Lady Osler collecting the money for the payment and it has since been continued.

McPresident: In behalf of the academic council, I have the honor to present to you for the reception of the degree of doctor of laws, honoris causa, Dr. William Osler, who has earned the enduring gratitude of this university by his devoted work and inestimable services in the organization and conduct of the Johns Hopkins Medical School and Hospital. Here he has been an unsurpassed and beloved teacher, above all in the wards of the hospital; a renowned and skillful physician, an important contributor to the science and art of medicine, an eloquent writer and speaker, an unwearied worker for the advancement of profession interests and of the public health, exerting an influence making for all that is highest and best in our profession. The chief ornament of our medical faculty, Dr. Osler has and will carry with him the affectionate good wishes and devotion of his colleagues and pupils; his name and fame will remain always a priceless possession of this university and of the Johns Hopkins Hospital."

The favorite address

Down Hall on Easter day - a general party of officers, governorship, if
any. Drive to the home of the Alumni in the University Club.

cf. Judge Wilson's story of Webster's son not being able to get his mother to say,

gardeners like about being on pattern

~~Johnsens like now~~ Log No. 6, signs to have out top 5 factors
to 15% ready the address to us.

Was exhibited in Tuesday paper.

"In making his last appearance at a public function of the Johns Hopkins University as a member of its faculty, Doctor Osler accomplished the remarkable feat of making an address which, both in its entertaining and semi-humorous part and in its retrospective and fully serious part, so fastened his hearers' interest as to divert their attention from the thought which would otherwise have been predominant in their minds - the thought of the loss the University and this community are about to sustain in his departure. No ingenuity of argument can diminish the feeling of what is the keenest part of that loss; for, while much may be said for the good that can come to a University from a change of professors, from the infusion of new blood, it remains an unescapable fact that there are some personalities that play a part which is unique, and for which no equivalent can be found by any formula. It is not simply by the estimate of his tangible and measurable services that the value of the presence of such a man as Osler is to be judged; and, when the delight of listening to his address was over, the first thought that came to many a mind was that the man who made the address is a man whose loss it is impossible for this community to think of without the most acute regret."

The storm did not break till the next day when it was headwind trying the early - but
"Oster recommends chloroform at sixty," and for days and weeks there followed
~~carries me out after the frost~~
days of discussion with ~~concerned~~, ^{none} constic, abrasive, and worse on the part
of meager readers few factors in all probability had won the medical-jurisdictive
which have been greater above; until Dr Osterrege became a tycoon for first Osterrege.
There were a few "Dear friends" they could be here ~~said~~ ^{seen} for they were sedulously kept
