Of Noted Doctors.**

SE **HE EXPECTS TO SAIL FRIDAY**

it- **Mrs. Osler And His Niece, Miss How-**
b- **ard, Have Gone To New York—**
Will Make Voyage On Cedric.

1.] [Special Dispatch to the Baltimore Sun.]

(r. Washington, May 16.—Dr. William Osler,
ed of Baltimore, came to Washington this
e morning and will remain here until Friday,
er when he will sail for England. Many of
y the most distinguished physicians of the
o country are in Washington this week and
rs among them Dr. Osler towers in interest as
ay one of the foremost physicians living. This
ial morning he attended the session of the twen-
vi tieth annual meeting of the Association of
ff American Physicians, a body limited to a
as membership of 150 men, all of whom have
ry made their mark in medical science. This
er evening he was one of the guests at the an-
ls nual dinner of the association, given at the
he New Willard Hotel at 7 o'clock.

r- Dr. Osler made his appearance at the
r- meeting of the American Physicians' Asso-
i- ciation shortly after it met. He entered
s- the room unostentatiously, but was im-
e- mediately noticed and was a center of inter-
e- est for all who were present. He remained
r- in the session with his colleagues until
s- shortly before 1 o'clock and participated in
r- the discussion of three of the scientific pa-
s- pers which were read, these being by Dr. R.
r- H. Fitz, of Boston; Dr. W. S. Thayer, of
r- Baltimore, and Dr. J. S. Thatcher, of New
s- York. His remarks, which were of a pure-
r- ly scientific character, were applauded.

r- The president of the association is Dr.
r- E. L. Trudeau, of Saranac Lake, N. Y., who
e- is probably the most distinguished author-
e- ity on tuberculosis in this country. In his
ate address Dr. Trudeau referred briefly but af-
ch, fectionately to the distinguished physician
Sec- from Baltimore, expressing regret on behalf
pers of the association over the loss which will
tary be sustained by the American medical pro-
Mr. fession through the promotion of Dr. Osler
any to his Oxford professorship.

Laft Dr. Osler is expected to attend the meet-
arge ing of the association tomorrow, but it is
city. doubtful whether he will be able to par-
onal ticipate in the deliberations of the first an-
y of nual meeting of the Association for the
wen Study and Prevention of Tuberculosis, of
rith which he is first vice-president. The latter
his body will be in session here Thursday and
rela Friday.

ese Dr. Osler was tendered an informal but
l a very sincere ovation at the dinner of the
nd American Association of Physicians at the
on Willard tonight. There were no speeches,
he but after the function nearly everyone pres-
ent shook hands with Dr. Osler and wished
his him success at Oxford.

Dr. Osler was accompanied by his guest,
Dr. Sandwitch, of London. Near them sat
Dr. L. F. Barker, of Chicago, one of those
who will succeed Dr. Osler in Baltimore in
the fall. Those present at the dinner were:

Drs. Hun and Pearce, of Albany; Drs. Prudden,
Meltzer, Jacobi, Northrup, Thompson, Vickery,
Peabody, James, Thacker and Kinnicut, of New
York; Dr. McPhedran, of Montreal; Drs. Lefeuer
and Finley, of Canada; Dr. Adami, of Montreal;
Drs. Weir Mitchell, Longstroth, J. K. Mitchell,
Abbott, Edsall, Stewart, Kelly, Griffith, Fussell,
Wilson, Musser, Hare, Kingoun and Tyson, of Phil-
adelphia; Dr. Korber, of Washington; Dr. Thayer,
of Baltimore; Drs. Fitz, Ewing, Richardson, Cabot,
Joelin, Williams, Jackson and Wright, of Boston;
Dr. Vaughan, of Ann Arbor, Mich.; Drs. Danforth,
Barker and Billings, of Chicago, and Dr. Greens, of
Minnesota.

Plans To Sail On Friday.

Dr. Osler left Baltimore early yesterday
morning for Washington to attend the meet-
ing of the Association of American Physi-
cians. He was accompanied by Dr. Wil-
liam S. Thayer, Dr. Thomas McCrae and
Dr. Henry M. Hurd. Tomorrow evening he
will go to New York to join Mrs. Osler and
his niece, Miss Howard, and has planned to
sail for the other side on Friday on the
Cedric, of the White Star Line. Drs. Thayer,
McCrae and Hurd will probably accompany
Dr. Osler to New York.
