

March 9th 1906, Northam Gardes

2.) The British Medical Association meets / Oxford
in Toronto, Aug. 21st. Would it not be possible for you to come out?
CUS417/109.31

The trip would take just about five weeks, and during that time you could go out to the Pacific coast and you could see the Eastern cities on your return. We are very anxious to have you take part in a joint discussion on the subject of Heart-Block. Gibson tells me he is going to visit you before long. He is going out to Canada and can give you additional information about it.

Prof. Wenckebach
