Hutchinson letters, 1906.

From W.O. to Mr. Hutchinson.

7, Norham Gardens,
Oxford,
March 30. ()

Dear Mr. Hutchinson,

On my return from town this morning I found your kind letter and the big book on Leprosy. What a strong case you have made against the fish! I do wish that some careful studies could be made on the bacteriology of the Fish-foods. Something might come of it. Your book should stimulate interest anew in the question.

I hope to be able to pay you a visit at Haslemere this Spring. It is always such a pleasure to see you.

Sincerely yours,

WM OSLER.

P.S.

Do you happen to have a copy of your lecture "Wisdom and Knowledge" given many years ago?
