October 20th, 1906.

Dear Shepherd:-

Elliot Galt came this week in much better condition than he was last spring. He will lay up for a month to see if the same sort of treatment will clear out the fluid. It is awfully sad to think that he should have such a serious disease.

I was delighted to see in the papers here that you had received the Harvard L.L.D. and in such select company. What a remarkable gathering it was! The men seem greatly pleased, too, with the British Medical meeting. Canada is getting a great boom here. We are struggling with alterations in a new house and hope to have it ready by the time we return. We sail November 28th. I saw Stephen MacKenzie a little while before he went off. He has had a very good summer.

With love to the girls,

Sincerely yours,

W^m Osler
