Jan. 31st, 1907

Dear Bowditch:-

You will be sorry to hear of Foster's death which took place suddenly on Tuesday last. I am sending you the Times with a very good obituary notice. I have not heard any particulars about the illness. He had been, I believe, very well. He had a fine life and full of usefulness, and he has been a great stimulus to physiology in this country.

We had a very good trip back and very short, five days and eleven hours.

Give my love to the family.

Sincerely yours,

W^m Osler
