(Card to Dr. Price)

2 I know of no other case. It would be worth reporting. No doubt all due to the lead. My case was most interesting. Look up in Olivers article ^{on} Allbutt, or drop a line to him at Newcastle as he has had more experience with lead than any one in this country

With kind regards to your colleague.

Yours sincerely

WM OSLER

P.S. Has the Ochronosis case any joint troubles
of a peculiar gait?
