January 22nd, 1908.

Dear Mac:-

The Aneurism section went off today and Gibson and I hope to send the balance in a week or ten days. What a broken reed you must think me! and what a reed I am! but you can easily get out IV and V before July. The volumes are following each other very rapidly and when ^{we} think^s of the ? in all these Systems you need not be discouraged. Ask Welch! I send the Endocarditis proof. Maude Abbott's section is A.A.1. Nothing better or so good in the literature. It will sell Volume IV - and the System! and will be a sort of Welchean section for the next generation as the Stomach article is in Pepper.

Add anything you like to my aneurism paper. It is fairly full for the G.P. I have not gone into needless *minutiae*. Cabot's section is also very good and Pratt's most excellent. The proofs are remarkable - very few mistakes and very good English.

Yours ever,

Wm. Osler.
