To

(Mr. Henry Phipps)

Dear Mr. Phipps: -

Please let me know when you are to be in London. I am sorry you cannot be here for the Darwin-Wallace celebration. I had hoped to have the pleasure of taking you. It will be a memorable occasion. I hear from Welch that you have become interested in the question of a Psychiatric Clinic. I visited last year this new department at the University of Munich and was greatly impressed with the whole equipment. They admit the borderland cases for study and the acute cases are really given as much study and care as typhoid fever or pneumonia. This is very difficult to get in the ordinary asylum. I have just had a report from Dr. Hamman of the Tuberculosis Dispensary, the work of which seems to have grown at an extraordinary rate. I felt certain that it would - just as soon as the people began to find out about it.

With kind regards to Mrs. Phipps,

Sincerely yours,

Wm. Osler.
