

(To Dr. T. R. Boggs, J.H.H.)

(Typewritten)

13, Norham Gardens, Oxford.
July 12th, 1909.

Dear Boggs:

I wish you could have been with us yesterday at Ewelme. Do let me know if you can come over. We shall be here until the middle of August, and then I return about the 10th of September.

The case of Aneurysm is very similar to the one described and figured in my paper on Aneurysm of the Abdomenary Aorta. Do report it as the diagnosis may be very obscure.

I have already sent you a memo. about the facts I wish dug out of the Aneurysm cases.

Ask Parsons if there are any good specimen illustrations of the Syphilitic Aortitis to have them photographed.

Wright's work would indicate that a great many of the Aortic Insufficiency cases are also luetic.

Sincerely yours,

W Osler
