

November 9th, 1909. CUS 417/108. 114

Dear McCrae:-

I suppose there is no doubt that Sydenham's Chorea is an infection, but it is not yet generally acknowledged as such. I would prefer simply acute chorea unless McCarthy is very keen upon the point. I have written to him.

So glad Southard is writing the abscess section.

All well here, and beautiful weather at last. Thank Amy for her nice letter.

Sincerely yours,

Wm. Osler.
