Jan.4th,10.

Dear Kelly,

I am sending you the photograph for the Residents' room at the Johns Hopkins Hospital. I think it is a capital idea you should get together the pictures of as many of the men as possible who have been connected with the Hospital.

I dreamt of you the other night-- a very curious circumstance, you were plenopentiary of England and America dealing with two Chinese, who were arranging terms after a successful overflow of the Chinese into Europe.

How does the biography progress ? I hope you may be able to arrange with the American Medical Association.

Love to Mrs.Kelly and the children, and kind regards to Miss Waterson.

Sincerely yours,

(signed) W.Osler
