

From the Regius Professor of Medicine, Oxford.

Sept. 21st, 10.

Dear Garrison:-

Many thanks for your papers which were most interesting. The one on the bone called Luz is extraordinarily so.

I am very sorry to have missed you in Washington, I was over on purpose to see Dr. Fletcher. Though he looks thin it was nice to see him so bright and well. My love to him.

Sincerely yours,

Wm. Osler.
