

13, Norham Gardens, Oxford. ^{CUS 417/110 56}

Oct. 20th, 1910.

Dr. C. P. Howard.

Dear Campbell:-

It is very nice to have your letter and to hear such good accounts of the work. I knew you would be busy as a bee from the start; you will have difficulty in finding time for your work.)

I am getting the slides ready; they will go next week by the American express. Some of them I am afraid have faded a bit. The set showing the rashes in infectious diseases will be most useful; I have forgotten who sent them from Cleveland to me, but they make a stunning set for demonstration of the rashes. The abdominal tumors will do for outside lectures.)

I am sending first the box with the 38 or 39 slides of infectious disease this week, as you may need them at once. They really give a splendid picture of the rashes; I wish I could remember the kind fellow who sent them to me. The students I know will appreciate them.)

So glad you have seen the Perkins. I have had letters from the Chicago men about you, from whom I am sure you will get a good welcome.)

Ike was back yesterday for his leave-out day, looking very well.)

We have a most glowing account of the baby from Marjorie.

Sincerely yours,

Wm. Osler
