Llanddulas

Dear Barker

I do hope you will be able to get away today. I should be so sorry to miss you. Yours with enclose has just come. I wish I had had it earlier as I have just sent off to the press the revise of a letter which I am sending to Remsen on Whole time Clin. Professors. He sent me a letter a month or two ago, & with it Flexner's Report. Kelly had sent his copy some time ago but it came when I was very occupied & I had not a chance to read it until a few weeks ago. It never should have been permitted to go out in its present form. You will see what I say & think of it. I am sending the letter to all the Trustees & the teachers of the school, as I believe most of them have had an opportunity of reading Flexner's Report, tho not for circulation. Your address will do good & it puts the clinical problem in its proper light - and it must be solved by clinical men not by the pure laboratory people who know nothing of it - as F's report clearly shows... More when we meet. - I will send a line to the Megantic on chance. So glad you have all had a good holiday, and are well again. What a time you had last winter! Thayer was with us for a week end - looking so well. We are all well enjoying the peace of this lovely spot, after a horrid racket. A baronetcy is a worrying honor - but fortunately it does not make any changes in one's sensations or in the general outlook on life.

Love to Miss Humpton. I have fortunately lost my plantigrade secretary - I did not kill her tell Miss H., though often tempted.)

Revere 1 1/2 taller than his daddy - a sweet lad but no student... The Agency has been doing a good business this summer, we have just settled Campbell Howard & Otilie Wright. C. is doing well, full of enthusiasm about the West. Love to the family. I hope Jack is gaining. I shall not be out this year. I am trying to revise the text book - very hard - It should be re-written. Miss Humpton could do it! I am getting Macrae to help. We expect them next week. By the way, since I last wrote we had a delightful visit from the Müllers. M. as you will see by my letter is strongly opposed to the whole time scheme - His evidence at the Lond. Univ. Commissn. was most interesting. It will be published before long - I will send you a copy...

I am sending this to Calvert St. but I hope to catch you with another letter to the Megantic.

Yours ever  
Wm Osler
