Dear Mac:-

Appletons are crazy. They cannot possibly get the book out by June. As I wrote and told them it was not part of my contract at all. It was specifically understood that the book was to be ready in time for the October sales. Just take your time over the proofs, and do not worry about it.

I am sending to-day the section on diseases of the digestive tract as far as the pancreas.

About the Index - Is there not some young fellow who could help on it? It would only be the new things. The old index is really very good. Next week I will send the diseases of the lungs.

Sincerely yours,

Wm. Osler.
