

From the Regius Professor Medicine, Oxford.

31st July, 1912.

Dear Garrison,

I am delighted to hear that the old Nestor is getting on so well. I must write to him at once. Do try and arrange to come over for the Congress next year. There seems to be a great deal of interest stirred up in the West on the subject of medical history. I have just received the Chicago Historical Club's Bulletin, which looks very nice, and they seem to be very wide awake in St. Louis.

*Dr. Fletcher*

I had hoped to be able to see you in October, but I am afraid now my Yale lectures will be postponed until the Spring.

Sincerely yours,

Wm. Osler.

13. Norham Gardens.
