Dr. F.J. Shepherd
152 Mansfield St.
Montreal,
Canada.

From the Regius Professor of Medicine, Oxford.

14th October, 1912.

Dear Shepherd,

I am very much distressed to hear that you are knocked out again with those confounded boils. Would it not be better to have another vaccine made and see if that would not prevent a recurrence? Send me a line to say how you are before long again.

We have had the most wonderful weather here for five weeks - making up for the wet summer. I saw Stevenson again. The line of demarcation was getting clear and Stoneham was to operate on Saturday. Unfortunately I could not go down, as I had intended, owing to an urgent Bodley meeting, from which I could not possibly be absent.

Love to the girls.

Sincerely yours,

^m
W Osler

13. Norham Gardens.

Stoneham writes that he stood the operation very well.
