From the Regius Professor of Medicine, Oxford.

16th November, 1912

Dear W. S.

I have sent word to Yale that I could give the lectures in the third week of April, i. e. beginning on the 20th, so that any time in the first week of May would suit me. But you had better not settle until I hear definitely from them, whether the dates I suggest are convenient. Ask Smith also whether the Phipps date is settled. The question arises whether such a general fore-gathering of the old House Officers should not be postponed until the 25th anniversary of the opening of the hospital - the following year. I suppose some of us are certain to last on till that date! It would really be a more suitable occasion, and I suppose the Hospital means to mark it in some way. Talk the matter over.

Love to Sister Susan.

Sincerely yours,

Wm. Osler.

13, Norham Gardens.
