(Dr. C. F. Martin, Montreal)

13, Norham Gardens, Oxford.

(Typewritten)

19th November, 1912.

Dear Martin:

Through a mishap Lady Graham did not take the cultures with her, but they will follow this week. I think it would be well worth trying. They have been greatly interested in the organism at the laboratory, as it is a sort of strepto-pneumococcus. I wish those cocci would have a little more phylogenetic respectability - they are of singularly loose morals!

I hope you are reasonably happy. Greetings to your v.m b.h.

Sincerely yours,

W<sup>m</sup> Osler.
