(Dr. W. S. Thayer)

From the Regius Professor of Medicine, Oxford.

28th November, 1912.

Dear W. S.

Why should not Post spend six months at the National Hospital, Queen's Square, where there is a great deal of ophthalmic work in connection with nervous diseases, and then take six months in Paris - or partly in Paris and partly in Germany?

My Yale lectures begin on April 20th, as I have already written to you. The question is whether we should have the old House Officers' reunion next year, or wait for the 25th anniversary - what do you think?

Love to Sister Susan.

Sincerely yours,

Wm. Osler.

13. Norham Gardens.
