

From the Regius Professor of Medicine, Oxford.

28th Nov. 1912.

Dear George Cheever, (Shattuck)

I am very glad indeed to have your little book which I am sure will be very useful for the senior student, and also for the practitioner. I wish, for the sake of the poor students, that we could have all the manuals of a more handy size.

Do urge your father to come over next year to the Congress in London and bring you. It is to be a great gathering.

Sincerely yours,

Wm. Osler
