

From the Regius Professor of Medicine, Oxford.

31st Dec. 1912.

Dear Parfitt,

It was a great pleasure to see the picture of the lassie, who looks a gem and a darling. What a delight she must be to you both! Is there any chance that you may come over for the Medical Congress in August? Do let me know; it would be such a pleasure to see you. I heard of you the other day from a Canadian doctor (I forget his name) who had been at Gravenhurst. It is so nice to hear of your progress, and it is good to have your reprints.

We are all well. Revere, now seventeen, has grown a big fellow, two inches taller than his father. He leaves Winchester this January to be tutored for his entrance examination.

We are very busy with the tuberculosis work here. It is a hard problem to get matters settled.

With love to your wife and Patsey and best wishes for the New Year,

Ever yours,

Wm. Osler.
