(Ac. Klebs) I am delighted to see your variolation paper in this month's Bulletin. It reads very well, and you certainly have presented the subject in a most satisfactory manner.....I am deep in my lectures, and hope to finish them before I sail early in April. I have not heard yet what I got from the Leyden sale - I ordered several things. Wellcome is having the most extraordinary historical exhibit prepared for the Congress that has ever been seen. It is remarkable the amount of material he has collected!
